Hookah Charcoal

Pistachio Shell Charcoal Briquettes

Mixed Charcoal Briquettes

Grooved & Plain Square Charcoal Briquettes

Chewing Gum Charcoal

Finger Charcoal Briquettes

Hexagonal (Honeycomb) Charcoal

Citrus Wood Charcoal

Pistachio Shell Charcoal Briquettes

Premium briquettes produced from pistachio shell carbon, offering high heat output, long burning time, and low ash content.

Mixed Charcoal Briquettes

Manufactured from selected carbon materials, providing an excellent balance of quality, durability, heat performance, and cost efficiency.

Grooved & Plain Square Charcoal Briquettes

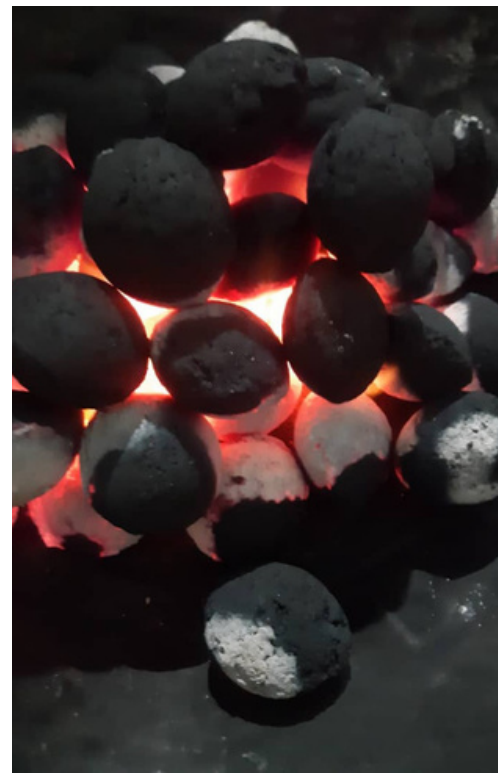

Available in grooved and plain designs, ensuring stable combustion, even heat distribution, and reliable performance.

Chewing Gum Charcoal

Compact charcoal pieces with clean burning characteristics, suitable for everyday hookah use.

Finger Charcoal Briquettes

Premium cylindrical charcoal briquettes featuring high heat output, long burning time, and low ash content. One of the most popular export products for hookah markets worldwide.

Hexagonal (Honeycomb) Charcoal

Hexagonal briquettes with a central hole for improved airflow, higher combustion efficiency, and longer burning duration.

Citrus Wood Charcoal

Natural charcoal produced from citrus wood, offering low smoke, low odor, minimal ash, and excellent performance for hookah cafés and export markets.

BBQ & Restaurant Charcoal

Premium Hardwood Lump Charcoal

Natural hardwood charcoal with high heat output, low smoke, and extended burning time.

Hardwood Log Charcoal

Large-size natural charcoal providing stable heat and long-lasting performance.

Grapevine Charcoal

Produced from grapevine wood with clean burning, excellent heat output, and long burning duration.

Slab Wood Charcoal

Natural charcoal produced from hardwood slabs with stable combustion and high heating value.

Self-Igniting Charcoal

Fast-lighting charcoal requiring no additional ignition materials. Ideal for BBQ grills, charcoal stoves, camping, and outdoor cooking.

Free Samples Available

Free product samples are available for qualified importers, wholesalers, distributors, and commercial buyers.

Customers can evaluate burning performance, heat output, ash content, and overall product quality before placing bulk orders.
